

FUNCTIONAL PARAMETERS OF THE SYSTEM OFFERED

Instructions for filling in the form:

The supplier fills in the value "YES" if this functionality will be in operation at the moment of submitting the final tender and at the same time will be fully available in the test environment for testing by the contracting entity.

The supplier fills in the value "NO" if this functionality will not be in operation at the point of submitting the final tender and will not be available in the test environment for testing by the contracting entity.

For each parameter which the system offered provides, i.e., where the supplier answers "YES" in this form, the supplier's tender will receive 1 subpoint in the evaluation criterion no. 3 (Article 10.3 of the Procurement Document). For each parameter which the system offered does not provide, i.e., where the supplier answers "NO" in this form, the supplier's tender will receive 0 subpoints.

	Requirement	Description	Complete YES/NO
1	Searching and indexing of repositories of Czech public and state higher education institutions	Searching and active indexing of no fewer than 16 repositories of Czech public and state higher education institutions within the meaning of the Higher Education Act. To be completed also in the case that the supplier's system indexes more than 16 repositories. The supplier will provide an annex to the indicative tender for this public contract containing a list of the indexed repositories. In case of doubt as to whether some of the listed repositories are in fact indexed, indexing will be verified as follows: the contracting entity will find in the repository of the given higher education institution one qualification thesis which was defended in 2019. Within the test of quality of originality check for academic text (see 10.2 of this PD), the thesis will be handed over to the bidder and the bidder will check its originality in real time in the course of testing.	[to be completed by the supplier]
2	Searching and indexing of repositories of Czech public and state higher education institutions	Searching and active indexing of no fewer than 20 repositories of Czech public and state higher education institutions within the meaning of the Higher Education Act. To be completed also in the case that the supplier's system indexes more than 20 repositories. The supplier will provide an annex to the indicative tender for this public contract containing a list of the indexed repositories.	[to be completed by the supplier]

		In case of doubt as to whether some of the listed repositories are in fact indexed, indexing will be verified as follows: the contracting entity will find in the repository of the given higher education institution one qualification thesis which was defended in 2019. Within the test of quality of originality check for academic text (see 10.2 of this PD), the thesis will be handed over to the bidder and the bidder will check its originality in real time in the course of testing.	
3	Searching and indexing of repositories of Czech public and state higher education institutions	<p>Searching and active indexing of no fewer than 24 repositories of Czech public and state higher education institutions within the meaning of the Higher Education Act. To be completed also in the case that the supplier's system indexes more than 24 repositories. The supplier will provide an annex to the indicative tender for this public contract containing a list of the indexed repositories.</p> <p>In case of doubt as to whether some of the listed repositories are in fact indexed, indexing will be verified as follows: the contracting entity will find in the repository of the given higher education institution one qualification thesis which was defended in 2019. Within the test of quality of originality check for academic text (see 10.2 of this PD), the thesis will be handed over to the bidder and the bidder will check its originality in real time in the course of testing.</p>	[to be completed by the supplier]
4	Grammatical correctness and writing style in the Czech language	Checking of academic writing – correctness of grammar and style in the Czech language.	[to be completed by the supplier]
5	Job parameters	<p>Variability of possible parameters of searching for textual similarity of the checked thesis:</p> <ul style="list-style-type: none"> • Exclude sources which are less than [possibility to set a percentage/number of words] • Exclude specific sources from checking (e.g., a setting whereby a thesis is not checked against CU theses repository) 	[to be completed by the supplier]
6	Size of report files	The size of downloaded report files should be proportionate to the original tested files to facilitate handling, sending, and sharing by the contracting entity. We consider 110% or less	[to be completed by the supplier]

		of the original file size to be a reasonable limit.	
7	Functional link to the document containing a text that matches the checked document	Display in the online interface of the system the whole target link (e.g., not only dspace.cuni.cz but more specifically https://dspace.cuni.cz/handle/20.500.11956/122883) to the document matching the checked document.	[to be completed by the supplier]
8	Functional link to the document containing a text that matches the checked document in a static report exported from the system	Display in offline export (similarity report) the whole target link (e.g., not only dspace.cuni.cz but more specifically https://dspace.cuni.cz/handle/20.500.11956/122883) to the document matching the checked document.	[to be completed by the supplier]
9	Grammatical correctness and writing style in the English language	Checking of academic writing – correctness of grammar and style in the English language.	[to be completed by the supplier]
10	Module for the support of academic writing	The module checks spelling, grammar, and style. The module should, in addition to detecting and correcting spelling and grammatical mistakes, provide the stylistic and lexical means for the support of formal, readable, and clear writing.	[to be completed by the supplier]
11	Export of feedback report	A file which was evaluated in the system can also be exported outside the system (e.g., for archiving purposes) in a readable format (e.g., pdf, xlsx, docx).	[to be completed by the supplier]
12	Export of feedback report into Moodle LMS	Data (values, e.g., marks, points) from feedback can be automatically imported into Moodle LMS. This functionality is available in the basic configuration of the supplier's system.	[to be completed by the supplier]
13	Export of feedback report into MS Teams	Data (values, e.g., marks, points) from feedback can be automatically imported into MS Teams. This functionality is available in the basic configuration of the supplier's system.	[to be completed by the supplier]
14	Recognition of Czech citation standards and quotations in the Czech language	<ul style="list-style-type: none"> • Ability to recognize (and depending on set parameters to exclude from checking) quoted material in the Czech language. • Ability to recognize bibliographic data as used in Czech academic texts (ISO 690). 	[to be completed by the supplier]
15	Uploading of large files	Support for theses with a size exceeding 1 GB and at the same time 1,000 pages in one file.	[to be completed by the supplier]

Annex No. 4 to the Procurement Document

16	Tools for feedback from students to teachers	After having submitted a thesis, a student has the possibility to react directly in the system to the evaluation and comments provided by the teacher.	[to be completed by the supplier]
17	Advanced statistics	Possibility of administration of statistics by individual faculties and other units of the University. In other words, the system has for example a role of “faculty administrator” who has the possibility to see the statistics of the system usage by his faculty; the system therefore has more than one administrator.	[to be completed by the supplier]
